
Republic of Guinea

Prime Minister Office

MOSIP & MOJALOOOP Guinea Experience

Dr Himi Deen T., Advisor in charge of Telecommunications and New Technologies
Ferdinand G. Technolyne

Zanzibar | 1/27/2022

Guinea Presentation

Country : Guinea
Capital : Conakry
Population : 12,5 millions
Population Growth Rate : 3%
Total Area : 245 000 km²
Official language : French

SWOT

Ability to handle project

National Strategies of Identification and Financial inclusion are prepared

Experience on Open Source solution (pionner in MOSIP implementation)

Political support

Financial services ecosystem motivation to communicate each other

Regulation on Telcos and DFS

Identification Issue: 4 millions people have no ID

Financial inclusion issue : over 8 millions have no bank account
No **interoperability** between systems
Low financial capacity

Competition with private companies (powerful lobbies)

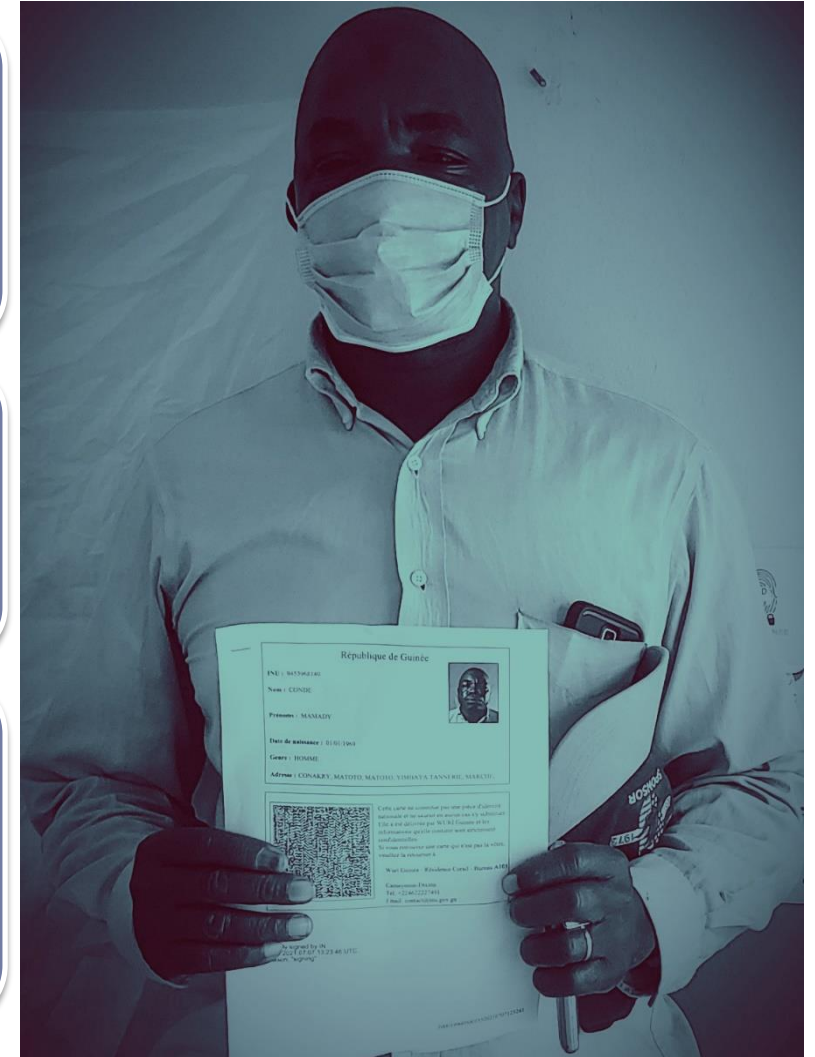

Legislation (taxes on digital services : 5% to our GDP)
Resistance to the changes

ID before Financial inclusion : WURI project

Component I: Strengthening legal and institutional framework

Component II: Establishment of Robust and Inclusive fID system

Component III: Promotion of access to services through fID

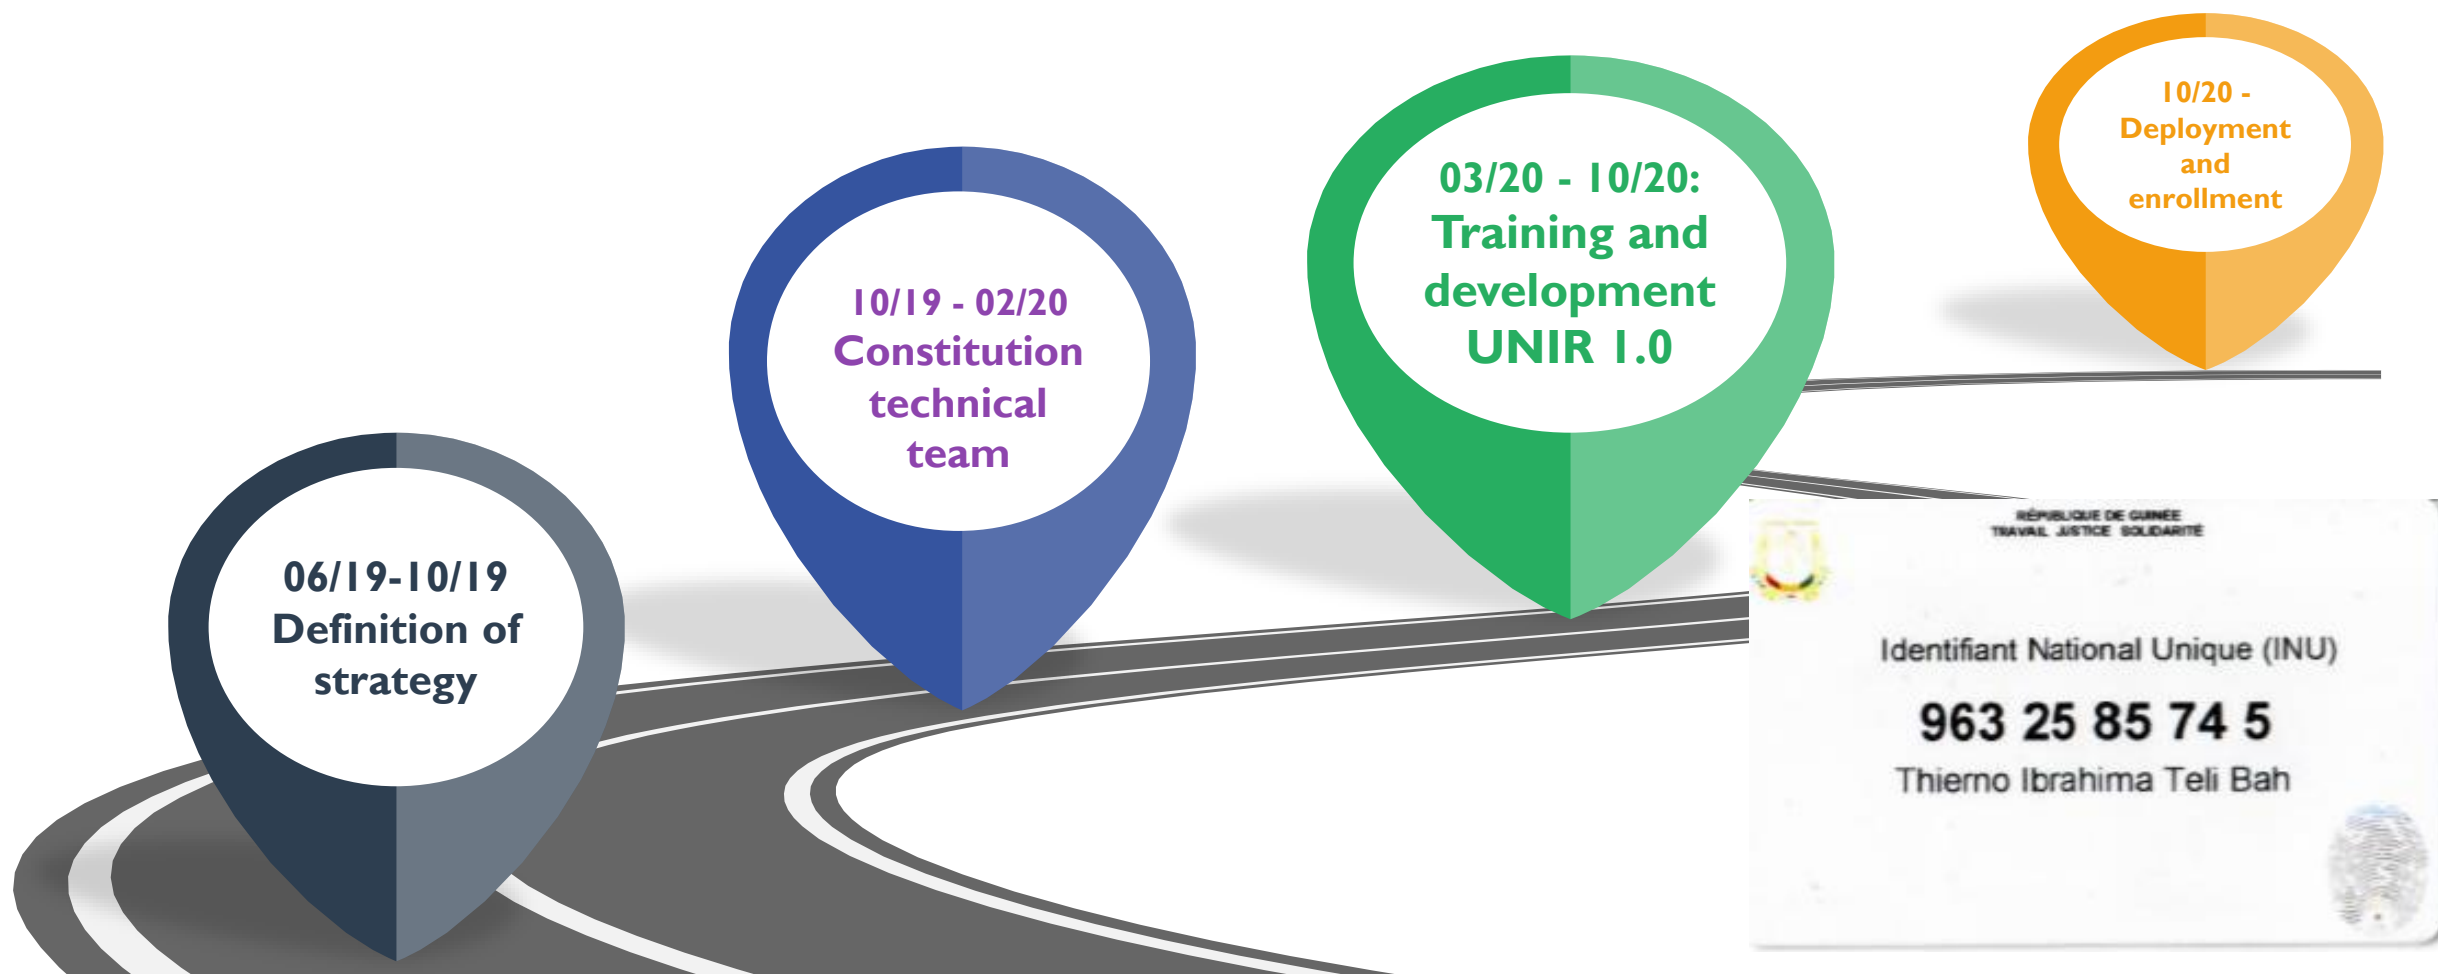

MOJALOOOP and MOSIP, similar experience ???

HOW WE ADDRESSED THE IDENTIFICATION ISSUE AND BUILD OUR
NATIONAL BIOMETRIC ID SYSTEM

MOSIP EXPERIENCE :
MODULAR OPEN-SOURCE IDENTIFICATION PLATFORM
(funded by Bill and Melinda Gates Foundation, Omydar and Tata Trust)

Chronogram

Technical implementation

- Development of the Roadmap
- Technical partnership with the MOSIP team
 - Why OpenSource?
 - Why MOSIP?
- Framing of implementation
 - Functional level requirements
 - Technical level
 - Task Management
 - Team Training

Pilot

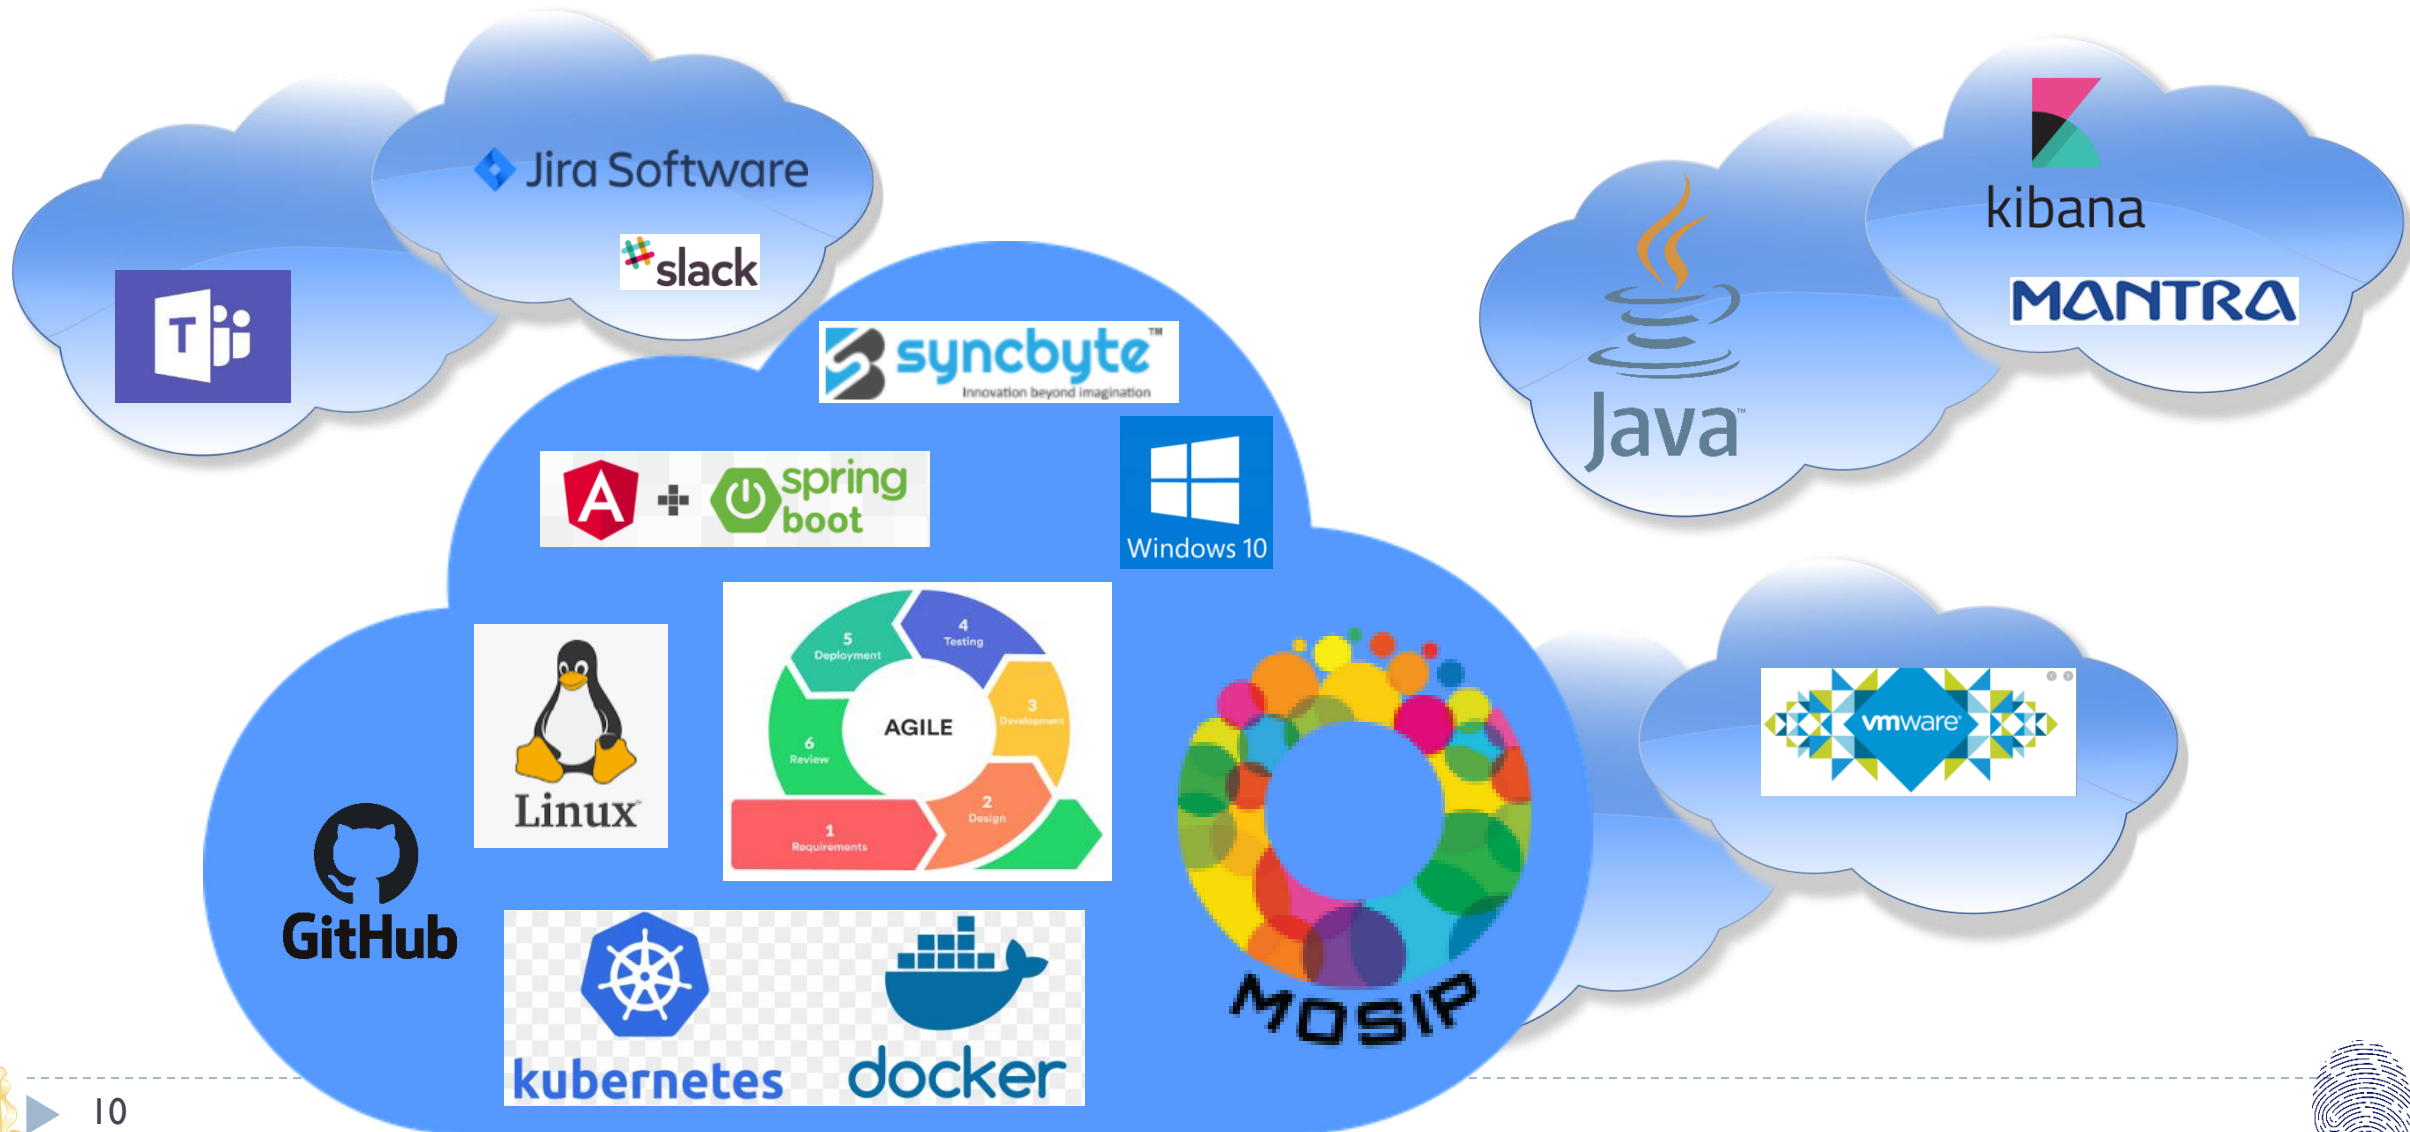

Component II (Setting up the Basic ID System)

- ✓ Establishment of Guinea technical team engineers
- ✓ Development of biometric identification platform, based on MOSIP
- ✓ Recruitment and training of twenty registration operators
- ✓ Hosting of data in local infrastructure (GUILAB) with strict compliance and international standards of **security** and of **Data protection**
- ✓ Registration of over **8,200** people in Conakry, Forécariah, Kindia, Mamou and Labé (June - July 2021)

Technical implementation: Technologies

Pilot approach

Technical implementation of the platform

Biometrics devices from different vendors
Kits set up by the technical team (**Interoperability**)

Customization of MOSIP 0.8.x -> 1.1.1

Communication and awareness in 10 localities

Establishment of complaint management committees

The pilot in pictures

Conakry

Labe - Poredaka

Kindia - Comoyah

Forecariah

Mamou

What about Mojaloop journey : the next step

thank you for your attention
